

Artificial Intelligence Is This the End of Humanity?

By Dean L. Gano, April 2024

In June of 2021, I wrote a [short paper](#) about how cancel culture worked at the time by exposing how Google totally controlled the narrative, but here we are almost three years later and the psychopathic elites have completely taken over the information exchange on the World Wide Web, aka the internet. In 2021, there were still a few search engines besides Google and Yahoo that provided an honest word search because they were using outdated search engines left over from previous Google and Bing search engines.

Today, instead of doing a web search for the specific words you type in the search window, their algorithms first determine if the subject is political, controversial, or otherwise involves the need to control the narrative. If not, it does a general word search, and you get what you are looking for. However, if your search is for the truth about a controversial topic, the Artificial Intelligence (AI) algorithms, which we know are written and controlled by the elite Big Tech intelligencia will only find links that reflect their official narrative.

An Artificial Intelligence tool called B12 specifically advertises that they can create the best, most compelling narratives using their AI tools. To appeal to the laziness of the [Sheeple](#), they say that using their AI saves the writers time and effort. Oh yes, saving time is far more important than evaluating your subject using logic and honesty to create your own understanding of the subject at hand; right? Besides, why would you want to learn anything when all the “knowledge” in the world is at your disposal simply by asking?

Here's an example of what has happened to the internet since 2021. At that time when I did a search on Google for any of the honest, evidenced-based papers found on our website (fact-checked.org) such as “[COVID-19 and Real Science](#),” nothing was found. When I did the same search on DuckDuckGo, the very first link you would get is exactly what you searched for. Today, if you search for this paper, on almost any search engine and specify it by adding “By Dean L. Gano” after the title, you get everything but what you searched for. Instead, out of the first twenty hits, you get three Amazon links to one of the three books I wrote about effective problem-solving and 17 other links that talk about how wonderful the Vaccines, the CDC and the WHO are, and how bad all the conspiracy theories and misinformation about COVID-19 is.

For another example, do a search for *COVID-19 Vaccine Injuries*, and in the first 20 hits, you find that half of them are from government websites like the CDC & NIH. They all say the same things such as, “The few serious side effects that we have observed in this, and other studies have been rare.” What is most interesting is that when you read these reports, the obfuscation is very apparent. It's all the [same lies we have been told for the past four years](#), with not a single link to the thousands of real scientific papers and articles that provide evidenced-based causal relationships showing that the

vaccines [destroy the immune system](#) and [shorten lifespan at a rate of 7% per jab, per year](#). It's as if "the AI" knows you are looking for the truth and makes sure you don't find it, knowing that access to all opinions will expose these liars as we did in our [COVID-19 and Real Science](#) and [Crimes Against Humanity](#) articles.

All these scenarios should scare you to death because it means the end of independent learning. Learning, as we once knew it, is on a steep decline, as evidenced by international tests of K-12 math, science, and reading skills; where the US ranks twenty-fifth and China ranks number one. In John Ellis' book "[The Breakdown of Higher Education](#)," we learn that our schools and colleges (where our teachers come from) have already been taken over by psychopaths who's stated mission is not a high quality education, but diversity, equity, and inclusion. Now, to make this insanity worse, the internet, which was once a vast open library of diverse ideas, has been converted to an indoctrination tool which ensures that the elite handler's official narrative is the only one you are likely to find. You no longer need to learn critical thinking skills because AI does that for you!

Additionally, AI is able to create what are called deepfakes. An AI-deepfake allows anyone to create a video of any person, saying anything they want it too. [Try it here!](#)

What does this mean? What is the endgame? That the only truth that will be allowed to exist is that which is told by these elite handlers who want to control us, the [Sheeple](#). Even Wikipedia has been taken over by these elite psychopaths because when you do a [search there for COVID-19 Vaccine Injuries](#), all you get is the official narrative that everything is all good and don't believe the conspiracy theories or other "disinformation." For more details see ["Misinformation" or Lies?](#)

Again, just think of the arrogance of these human-like creatures to think that they should change the basic model of the internet search from a simple democratic "word search" model to a model that does the thinking for the user. Only a psychopathic mind bent on control could believe this is a good thing because it totally violates the free will of the user. The free will that looks at all the available knowledge on the subject and then makes its own judgement. To learn more about these psychopaths read: "[Truth Be Told](#)."

When I asked the people at DuckDuckGo and Ecosia how their search engines worked, they said they don't know, it's all done by a third party. When I asked who that was, they said they use Bing and Google, which have always been controlled by Woke psychopaths. And according to the [Search Engine Journal](#), both Bing and Google use Artificial Intelligence algorithms and they have plans to develop it further. Currently there are [lots of problems with it](#), such as when one user asked which mammals have the largest eggs, it replied "Elephants."

By dominating the 'truth' narrative, humanity itself is threatened, not to mention the destruction of the United States of America. As Dwight D. Eisenhower shared with us in his [Open Letter to America's Students](#) in 1948: "To assure each citizen his inalienable

right to life, liberty and the pursuit of happiness was the 'why' behind the establishment of this Republic and is today the 'why' for its continued existence."

By making sure only their narrative is found, these elite pukes are violating our first amendment right of free speech, but because this violation is hidden within the AI construct, no one sees it that way, but that is exactly what is happening. By totally controlling the narrative on every subject and only allowing one perspective, it will be impossible for this republic to continue as the beacon for the right to life, liberty, and the pursuit of happiness. And it will be impossible to create a common and better perspective of the "truth" created by input from all stakeholders. Unbeknownst to the Sheeple, they will all become useful idiots in the [takeover by the Marxist psychopaths](#) behind this evil movement.

Eisenhower goes on to say, "It is dangerous to assume that our country's welfare belongs alone to that mysterious mechanism called 'the government.' Every time we allow or force the government, because of our own individual or local failures, to take over a question that properly belongs to us, by that much we surrender our individual responsibility, and with it a comparable amount of individual freedom. But the very core of what we mean by Americanism is individual liberty founded on individual responsibility, equality before the law, and a system of private enterprise that aims at reward according to merit." And all that is going away now that Artificial Intelligence is controlling our access to knowledge.

But, if you want to fight for the survival of humanity, please spread the word about what is happening by sharing this information with everyone you know. Perhaps this evolves into another form of communication where only trusted sources, created by real humans that allow multiple viewpoints, is used to find answers. Or the semi-honest search engines like DuckDuckGo and Ecosia that profess to be champions of freedom, will invest in a real "word search" browser like what we use to have. Right now, the owners of these search engines are just more useful idiots serving these elite psychopaths and if they changed back to honest search engines, they would dominate the internet and the psychopaths would lose this death grip. Where is the dedication to honesty and quality that used to govern our world?

Epilogue: An online source, [Search Engine Journal](#), provides a list of 23 search engines you can use instead of Google, but when you evaluate them, you see they all use Bing, Google, or some other AI driven algorithms for a specific purpose like finding videos. The only one that found my COVID-19 and Real Science article was [Brave](#), but you had to include "By Dean L. Gano," to make that happen. Without that qualifier, all they provided was the [standard lies](#).
