On December 4, 2024, the Select Subcommittee on the Coronavirus Pandemic concluded its two-year investigation into the COVID-19 pandemic and released a final report titled “*After Action Review of the COVID-19 Pandemic: The Lessons Learned and a Path Forward*.” The [full report can be found here](#), but a summary of some key findings showing how our own government not only lied to we-the-people, but are directly [responsible for the deaths of many Americans](#). Since February 2023, the Select Subcommittee has sent more than 100 investigative letters, conducted more than 30 transcribed interviews and depositions, held 25 hearings and meetings, and reviewed more than one million pages of documents. As an oversight committee, they do not have any authority to prosecute the psychopaths who perpetrated this travesty, but it provides a great starting point for our new Department of Justice, and I sure hope they follow through. While I only listed a few of the [35 findings](#), the following ones provide the best evidence of how our trusted government purposely ignored evidenced-based science in order to pursue their psychopathic need for power. Summaries were written by the subcommittee.

SOCIAL DISTANCING: The “6 feet apart” social distancing recommendation — which shut down schools and small business across the country — was arbitrary and not based on science. During closed door testimony, Dr. Fauci testified that the guidance, “sort of just appeared.”

MASK MANDATES: There was no conclusive evidence that masks effectively protected Americans from COVID-19. Public health officials flipped-flopped on the efficacy of masks without providing Americans scientific data — causing a massive uptick in public distrust.

LOCKDOWNS: Prolonged lockdowns caused immeasurable harm to not only the American economy, but also to the mental and physical health of Americans, with a particularly negative effect on younger citizens. Rather than prioritizing the protection of the most vulnerable populations, federal and state government policies forced millions of Americans to forgo crucial elements of a healthy and financially sound life.

COVID-19 VACCINE: Contrary to what was promised, the COVID-19 vaccine did not stop the spread or transmission of the virus.

VACCINE MANDATES: Vaccine mandates were not supported by science and caused more harm than good. The Biden Administration coerced healthy Americans into

compliance with COVID-19 vaccine mandates that trampled individual freedoms, harmed military readiness, and disregarded medical freedom to force a novel vaccine on millions of Americans without sufficient evidence to support their policy decisions.

NATURAL IMMUNITY: Public health officials engaged in a coordinated effort to ignore natural immunity — which is acquired through previous COVID-19 infection — when developing vaccine guidance and mandates.

COVID-19 SCHOOL CLOSURES: The “science” never justified prolonged school closures. Children were unlikely to contribute to the spread of COVID-19 or suffer severe illness or mortality. Instead, as a result of school closures, children experienced historic learning loss, higher rates of psychological distress, and decreased physical well-being.

Epilog: While the subcommittee provided good evidence of government malfeasance, it fails to investigate many other crimes against humanity. Here are [75 + suggestions](#) for further investigation from Dr. Robert Malone, inventor of the mRNA vaccines.
